

Fall EMS Workshop 2011

Advanced Medical Life Support

**November 12th & 13th, 2011
8 a.m.-5 p.m.
Activity Center West on the LCSC Campus**

NAEMT's Advanced Medical Life Support (AMLS) course is the first EMS education program that fully addresses how to best assess and manage the most common medical crises in patients, offering a "think outside the box" methodology.

AMLS is a 16-hour comprehensive EMS continuing education course addressing the assessment and management of patients. It is for all levels of practitioners with a strong commitment to patient care, including first responders, emergency medical technicians, paramedics, nurses, nurse practitioners, physician assistants, nurse anesthetists and physicians.

The course emphasizes the use of scene size-up, history, interactive group discussion on potential treatment strategies, and physical exam to systematically rule out and consider possibilities and probabilities in treating patients' medical crises. The course offers an initial assessment-based approach that progresses to a diagnostic-based approach to quickly develop the best treatment plan.

Cost is \$95 per person to include lunch and snacks both days.
Books, not included, will be available for purchase
